

## Week10

Description	Feedback or Reflection from	Decision and activities
Regarding our presentation, we can introduce more about our semester content in the introduction section.	Client	We will adjust the focus of introduction and will introduce more about the customization UI and CRUD
In the User interface section, the title of the initial design is suggested to be changed to initial inspiration	Client	Sayed changed it.
In the UI part, reduce the introduction of specific details or commonalities, such as the delete key is red, and more introduce our unique design features.	Client	Sayed will adjust his presentation content.

<p>In the static file conversion part, this is a good piece, but to use the exact word, do not use maybe, might, could.</p>	Client	<p>Linyu will avoid using these words during presentation.</p>
<p>The front-end description of the degree of the compulsory course is not clear enough.</p> <p>At the same time, this function should be improved for several courses in several courses. (The current state is that all relate to and, there is no option to provide or)</p>	Client	<p>Due to time constraints, we decided to make the original description clearer, indicating that it is using and linked, and leaving the interface as a missing feature.</p>
<p>Client suggested that we post comments on all logic code after the tenth week to help the</p>	Client	<p>We decided to complete this content from the 11th week to the twelfth week and comment out the logic code (py file, url, newly created database) of all our codes.</p>
