Agenda item: Assign task to draw ER diagram	Presenter: All members
Agenda item: Discuss how to identify specific entity	Presenter: All members
Agenda item: Discuss the understanding of code in database	Presenter: All members

Discussion:

1. We further understand the code implementation in database processing in this project.
2. We have initially established the cognition of eleven entities involved in accounts, degrees, feedback, and super users.
3. Mr. Liu will be responsible for the ER diagram of the first four entities, Mr. Zhang is responsible for the middle four, and Mr. Xia is responsible for the last three and integration.
4. Django as a specific element in database processing, we will not consider it as an entity.
5. Discussed the need to become more familiar with drawing tools and arrangements for further understanding of the code.
