

## Week6

Description for each element in the landing page should be only one sentence.	client	Xiangyu has already fixed this problem
Untitled issue of the search page	client	Xiangyu and Sayed will fix this problem before Friday(Xiangyu already fixed it)
We can not put too much work in SPRINT2	client and our team	Only do the read function and create function and testing of read function in sprint 2
The UI test should better not be shown as screenshot	client	Our best effort for now is to provide a model using “marvelapp” application ( <a href="http://www.marvelapp.com">www.marvelapp.com</a> ) to do the early UI test(Sayed)
The table of searching result should be black and white to enhance the recognition.	client	We will consider this issue when designing the UI.(Xiangyu)
Show demo in AUDIT, it should start from the start interface	client	Xiangyu will reconsider the order of presentation, making the entire demo more clearly
At the time of the presentation, the speech speed should be slowed by 20%.	client	In the process of presentation, we will express it at a slower rate of speech and at the same time increase the font size to make the audience easier to understand.
Test- Can just tell the tester what they need to do, but don't explain, and get the test results	client	We will follow this method when we test.
There should be only one search bar for the search page	client	Xiangyu has fixed this problem

all the data in the search table should be linked which could be click to another page	client	Xiangyu and Sayed will do it in mid-term break
Preparing documents from team work, communication, decision-making, outputs, and reflection	shadow team	Refactor the structure of the repository to complete the missing files.(Yichen)
