

Million team Self-reflection

Zifeng Liu

Date: 22/09/2019 (week7)

Role: Developer

1. What have I done since the last time reported?

I focused on the stuffs of completing the database, such as creating new tables, figuring out the usage of some functions, and tried to fix the bugs of models.py.

2. Self-reflection?

I haven't spent enough time due to a mid-term exam of other course. In the terms of researching, I think I could be more careful when reading codes and improve my research skills to save time.

3. What is the plan until next time report?

Focusing on the database and transform json files into database.
