

Million team Self-reflection  
Rui Zhang  
Time: 6/10/2019(Week9)  
Role(s): Developer/Risk manager

What have I done since the last time reported?

This week, I did a lot of thinking and working on making posters, especially on layouts. We submitted a poster for our project this week, although it may still contain a lot of deficiencies, but we have improved it several times and made 100% effort.

I assisted our group members to deal with some other non-technical problems.

Self-reflection?

This week, the assignments of other courses put tremendous pressure on the progress of my project. I don't think I'm doing enough in this week. Even though I did my best to make a poster, I didn't have time to get the technical work done in time at the back end. This is my regret.

What is the planned until next time report?

Next week is our final audit week. I hope that I can do my best to solve the back-end problems, prepare for the show, write the presentation-script, ask the client for as many comments as possible, and finally improve the quality of the ppt.
