

Week9

Description	Feedback or Reflection from	Decision and activities
The title of the Problem should be changed to Context.	Client	
Orange may be too much color (We use more than 3 colors)	Client	Adjust the color of the other parts so that the orange color is not more colors, and Rui Zhang is responsible for adjusting this.
The second sentence of problem should explain why we need a customization interface.	Client	For example, we need to update the system daily up to date information so that students can use the system correctly. If the student wants to continue using it in the next few years, then we need Manual update information
Tech part of the poster: API and Django database and similar, should be put together Front-end (because everyone has it) so shouldn't it be here, so we can change it to good User interface	Client	Linyu is responsible for adjusting this.
Solution part of the poster: A. delete the first part, leaving only the second part. B. Since the first part is not what we did, we only did the custom UI to allow the staff to manipulate the data. C. increase the description Login system	Client	Xiangyu is responsible for adjusting this.
Impact part of the poster:	Client	Yichen is responsible for adjusting this.

<p>A. The second and third parts should be deleted</p> <p>B. Why MVP needs to be done, useful to anyone, maybe useful to both developer and staff,</p> <p>C. If we can prove indirectly</p> <p>D. Some important information is incorrect, but with our CRUD we can fix this information</p>		
Should be able to search using the Enter button (degree cannot use enter button to search)	Client	Xiangyu fixed it.
<p>A, The first column of Degree is too wide</p> <p>B, The first two lines of MMS should be widened.</p>	Client	Re-adjusted the layout to make it more beautiful
There should be highlight, MMS's description should only have one line, maybe only 75 words.	Client	The search algorithm was adjusted to meet the requirements.
It is recommended to put scope and problem together.	Tutor	We did not separate the two after considering it, but made them more distinguishable.
The technical part should be more non-technical, making it easier for viewers to understand	Tutor	Reduce the use of technical terms as annotations, and only put technical terms into the ICON used.
Some English is not good enough, some places have errors.	Tutor	Repeated verification by multiple people before submission to ensure their accuracy.
At the time of submission, we found that we did not have our team name.	Self	We should check this issue early and get in touch with the person in charge as soon as possible. We found it after 5 pm on Friday. Fortunately, this problem has been fixed.
