Million team Self-reflection
Zifeng Liu
Date: 1/10/2019 (week8)
Role: Developer

1. What have I done since the last time reported?
   I focused on working out the create and delete function. It includes searching for the Django model functions and coding our own functions.
2. Self-reflection?
   I am not familiar enough with the Django framework, and it cost me a lot of times to do the research and I actually coded some duplicate codes.
3. What is the plan until next time report?
   Finish the create and delete functions. Then, get into the next stage which is the CRUD functions of elasticsearch.
