Week5

Description	Feedback or reflection from	Solution and activities
Agenda for AUDIT should be beautiful enough and only show important content（not something like the Excel）	client	Pay attention to this issue, and in the subsequent AUDIT pay more attention to content rather than form
Landing page and each specific page should not appear at the same time, or should fix this problem	client	Remove the separate landing page and use each specific search directly as the start page
Unable to complete create feature in sprint1	our team	Decided to move Create feature to sprint2
Divide the original ER diagram into three blocks, indicating which actual database belongs to that piece, and make sure there is no duplication, under the 3NF standard.	tutor	Arrange zifeng to continue to improve the ER diagram
our 30 seconds weekly pitch is not good	tutor	Kundu has written a version and sent it to everyone to make sure everyone has a clearer pitch.
How to answer questions about tasks we have not done yet	tutor	Prepare the answers might be asked in group
We should reduce the discussion of management in presentation but increase the discussion of specific project management behaviors.	Client	In subsequent presentations, use specific behaviors to prove the methodology used.
should not present the client vision and client expectation in the AUDIT	client	should focus on how to solve the problem and how to manage the team
