Million team Self-reflection

Xiangyu Chen

Time: 19/09/2019(Week7)

Role(s): Software Developer/User Experience Research

1.   What have I done since the last time reported?

I finished the basic read function according to the sayed's model. Now staff can
search degree,course,MMS(major,minor,specialisation) and get detailed
information.

I finished the edit button in the degree and course page.

2.   Self-reflection?

 Due to insufficient communication within the front-end team, we may waste some
time to do the duplicated job. We need to discuss which part of the tasks should be
done first.

3.   What is the planned until next time report?

Finish the add page for degree, course, and MMS and successfully send these data to
the backend.
