Team Meeting

Meeting called by:	Kundu Gui	**Type of meeting:**	Team meeting
Facilitator:	Kundu Gui	**Note taker:**	Kundu Gui
Timekeeper:	Kundu Gui		

Attendees: Kundu Gui, Sayed Zulfikar, Xiangyu Chen, Zifeng Liu, Rui Zhang, Yichen Li, Lingyu Xia

Please read: None

Please bring: None

Agenda item: Welcome and Introduction   **Presenter:** Kundu Gui

Agenda item: GitHub-Branch problem   **Presenter:** All members

Agenda item: Discussed how to improve the way we track our project   **Presenter:** All members

Agenda item: Discussed whether the order of the project should be modified   **Presenter:** All members

Agenda item: Show the latest version of the UI interface   **Presenter:** Sayed

Agenda item: Book a room for the next meeting   **Presenter:** Kundu Gui

Discussion:

1. We discussed how to deal with branch issues and decided to work together as a day of combined code.

2. Discuss whether we should not use the original CRUD order to develop, but instead switch to doing all its CRUD functions directly on a separate course, and then copy it to other levels such as degree, MMS.

3. Discuss should we put all our files in the same folder.

4. We may need to have a better tracking method. For example, everyone has a small report every week, which ensures that the meeting is more efficient, and all other team members can also track and provide suggestions for modification. The work of capable people is related to the project.

5. The current UI interface is displayed in the group.

7. Decide what features should be done first.
